| • Presentation Skills | • Power Query | • Business Insight |

PROFESSIONAL EXPERIENCE

Zamp Analytics MIS Data Analyst	2023
• Built automated MIS dashboards using Excel & Power BI, reducing manual reporting effort by 30–40%. • Prepared daily, weekly, and monthly MIS reports covering productivity, SLA adherence, ROI, and operational KPIs. • Used SQL queries to extract and analyze operational and marketing data for performance tracking. • Collaborated with stakeholders to align reporting with business goals and support data-driven decisions. • Presented insights to leadership, highlighting trends and optimization opportunities.	

PROJECTS

MIS Reporting Dashboard – Automation & Insights (Excel) | Sector: IT Services

- *Built an automated Excel MIS dashboard to track operational KPIs such as productivity, SLA adherence, and process efficiency.*
- *Structured and analyzed transactional and departmental data to identify performance gaps and optimize reporting processes.*
- *Used operational and transactional data to enhance MIS insights, monitor performance trends, and support data-driven business decisions.*

SQL-Based Revenue & Enrollment MIS | Sector: IT Services / Technology & Analytics

- *Developed SQL queries to extract and analyze revenue, enrollment, and operational performance data.*
- *Identified top-performing regions, high-value customer segments, and process efficiency trends.*
- *Delivered MIS reports on growth patterns, revenue contribution, and operational performance to support management decisions.*

SQL & Tableau MIS Dashboard – Process & Performance Monitoring

- *Designed an interactive Tableau MIS dashboard to monitor operational KPIs, resource utilization, and process efficiency.*
- *Implemented filters and dynamic parameters for department-wise and region-wise performance tracking.*
- *Highlighted high-efficiency processes and key performance areas to support process improvement and data-driven decision-making.*

Excel-Based A/B Testing & Web Performance Analysis | Sector: IT Services / Technology & Analytics

- *Conducted A/B testing using Excel to analyze website performance, user interactions, and conversion trends.*
- *Identified high-performing web page designs by evaluating engagement metrics and conversion efficiency.*
- *Delivered actionable insights to the web development team to optimize user experience and drive data-driven design improvements.*

Power BI Dashboard for HR Metrics

Human Resources Analytics

- Built a Power BI dashboard for HR to track metrics such as headcount, turnover, absenteeism, and diversity
- Enabled HR managers to monitor key workforce indicators and improve employee retention
- Presented the dashboard to HR leadership for more data-driven decisions on personnel management

Tableau Data Visualization for Employee Performance

HR Analytics

- Created an interactive Tableau dashboard to track employee performance across various KPIs such as productivity and training completion
- Visualized performance review scores to identify high performers and areas needing improvement
- Presented findings to HR management, contributing to employee development and retention strategies.

EDUCATION

- BCA (Bachelor of Computer Applications)
Peopletree College of BBA, BCA belagavi.
CGPA/Percentage: 7.24
