Hiring Manager

Capgemini

Subject: Application for Data Analyst (Job ID: 374875)

Dear Hiring Manager,

I am excited to apply for the Data Analyst position at Capgemini. With hands-on experience in MIS reporting, dashboard development, and KPI analysis, I bring a strong foundation in transforming raw data into meaningful business insights.

During my internship as an MIS & Data Analyst at Upskill Digital Academy, I developed automated MIS dashboards using Advanced Excel and Power BI, reducing manual reporting effort by 30–40%. I regularly generated MIS reports covering productivity, SLA adherence, ROI, and operational KPIs. Additionally, I used SQL to extract and analyze large datasets, enabling stakeholders to make data-driven decisions.

I have also completed projects involving SQL-based revenue analysis, Tableau performance dashboards, and Excel A/B testing. These experiences strengthened my analytical thinking, attention to detail, and ability to communicate insights clearly to both technical and non-technical stakeholders. My core technical skills include Advanced Excel, Power BI, SQL, Tableau, Power Query, and Python.

I am particularly motivated to join Capgemini because of its strong reputation in analytics-driven consulting and global delivery excellence. I am eager to contribute my analytical skills and learn from your high-performing teams.

Thank you for your time and consideration. I look forward to the opportunity to contribute to Capgemini.

Sincerely,

Vijayanand Rathod
